

THE BARBADOS KENNEL CLUB

Application to the Barbados Kennel Club for approval to import semen.

The applicant (the owner of the bitch to be artificially inseminated) must obtain approval from The Barbados Kennel Club for the procedure prior to the insemination. The application is likely to be approved provided:-

- a) The semen is from lines clear of hereditary defects in the breed.
- b) A declaration is received from the owner of the donor dog confirming that the dog has produced at least one registered litter naturally.
- c) The dam is under the age of eight (8) years at the time of whelping.
- d) The dam has not previously whelped six (6) or more litters.

The attached application (Part 1) must be filled out by the owner of the dam and forwarded with an official three Generation Pedigree of the donor dog to the Barbados Kennel Club for approval.

CERTIFICATION OF EXTRACTION OF SEMEN AND BREEDING BY ARTIFICIAL INSEMINATION

Part 2 must be completed by the owner of the sire and certified by the Veterinary Surgeon extracting the semen from the donor dog and inseminating the bitch in Barbados.

All arrangements relative to the importation and storage of the semen locally must be made by the applicant with the Ministry of Agriculture, Veterinary Services, The Pine, St. Michael.

REQUIREMENTS FOR REGISTRATION OF A.I. LITTERS

Application for registration of a litter resulting from Artificial Insemination must be made on The Barbados Kennel Club's Application Form for Registration and must be accompanied by the documents required by the BKC and the Ministry of Agriculture, Veterinary Services.

Litters produced by AI from bitches that have not previously produced a registered litter naturally may be registered, but the BKC will not register a litter produced by AI from one of her female progeny unless the said progeny has already produced at least one registered litter naturally.

Part 1

APPLICATION FOR THE BARBADOS KENNEL CLUB'S APPROVAL TO IMPORT SEMEN FOR THE PURPOSE OF ARTIFICIAL INSEMINATION
